Skype: rkanda_cit

Education

California Institute of Technology, *Division of Geological and Planetary Sciences*
Ph.D. Geophysics, 2010
Dissertation: Mechanical Models for Interseismic Deformation in Subduction Zones
Advisor: Prof. Mark Simons

University of Kentucky, *Department of Geological Sciences*
M.S. Geology, 2003
Thesis: Nonlinear Asperity-Scale Frictional Melting Model
Advisors: Prof. Kieran O'Hara (Geol.), Prof. Jim McDonough (Mech. Eng.)

University of Cincinnati, *Department of Civil & Environmental Engineering*
M.S. Environmental Engineering, 1997
Thesis: A Model for Urban Ozone Dynamics in the Cincinnati Metropolitan Area
Advisors: Prof. Pratim Biswas, Prof. Shafiq Islam

Indian Institute of Technology – Bombay, *Department of Mechanical Engineering*
B.Tech. Mechanical Engineering, 1994
Senior Thesis: Experimental & Theoretical Study of Gas-Liquid Slug Flows in Horizontal Channels

Professional Experience

Research Fellow	Utah State University		2016 - Present
3D Modeler/Detailer	Nucor Building Systems *(steel buildings)*		2016-2018
Post-doctoral Associate	Utah State University	Mentor: Tony Lowry	2014 - 2016
Post-doctoral Fellow	National Taiwan University	Mentor: John Suppe	2010-2014
Teaching Assistant	California Institute of Technology (*Geodynamics, Inverse Theory, Field Geophysics*)		2005-2007
Research Assistant	California Institute of Technology	Advisor: Mark Simons	2004-2010
Research Assistant	University of Kentucky	Advisor: Kieran O'Hara	2001-2003
Teaching Assistant	University of Cincinnati (*Fluid Mechanics*)		1995-1996
Environmental Engineer	Science Applications International Corporation		1997-2002

Grants, Awards and Honors

Selected Grants Pending**,** Utah State University

USGS: Toward Earthquake System Science: Western U.S. Lithospheric Stress/Strain Partitioning of Mantle Dynamics; with Tony Lowry (USU); $179,086 to USU. 2016-2018
NSF: Dynamics and rheology of Africa's magmatic rift zone from modeling of potential field and seismic data; with Tony Lowry (USU), and Cindy Ebinger (Rochester); $ 154,132 to USU

Gutenberg Fellowship, Seismological Laboratory, California Institute of Technology 2003-2004
Department-wide competitive award given to the best incoming PhD student

Pirtle Fellowship, Department of Geological Sciences, University of Kentucky 2001-2003

Research Interests

Crustal and lithospheric dynamics: 3D/4D numerical modeling of regional tectonic deformation over timescales for mountain-building/orogenesis (tens of million years), incorporating plate-motion history, as well as realistic material properties (rheology) and Earth structure.

Developing spatio-temporal constraints for numerical models (i.e., initial and boundary conditions): new plate-motion histories; lithospheric/mantle structure inferred from tomography; present-day 3D lithospheric stress field from focal-mechanisms; gridding geologic datasets.

Seismic hazards: Complete seismic-cycle simulations (~10^2-10^3 yr scale) of fault creep following seismic ruptures along realistic 3D faults, using high resolution geodetic, seismic, and neotectonic datasets to constrain fault/off-fault rheology.

Professional Service

Session co-convener, American Geophysical Union Fall Meeting (*T51F/T53C*) 2010

Linking Geodetic Observations to Mechanical Properties of the Lithosphere: New Methods & Models

Peer review: *NSF-EAR, Geophys. J. Intl. (GJI), Earth Planets Space (EPS), Seismol. Res. Lett. (SRL)*

Teaching Experience

Dept. of Geolsciences, Utah State University: *Adjunct Faculty* 2014

- **Numerical Geodynamic Modeling** (*Graduate/Undergraduate mini-course, Fall 2014*)
- **Applied Geophysics** (*Advanced Undergraduate/Graduate, Spring 2020*)

Division of Geological & Planetary Sciences, Caltech: *Graduate Teaching Assistant* 2005-07

- **Geodynamics** (*Graduate, Spring 2007*): Prof. Mike Gurnis
- **Inverse Theory** (*Graduate, Winter 2007*): Prof. Malcolm Sambridge (visiting from ANU)
- **Field Geophysics** (*Graduate/Undergraduate*): Profs. Rob Clayton, Mark Simons, Joann Stock.
  Spring 2006: GPS, gravity, magnetic, seismic, & resistivity surveys: Chalfant Valley, E. California.
  Summer '2005: Developed Matlab-based graphical user interface for field seismic refraction studies

Dept. of Civil & Environmental Eng., Univ. of Cincinnati: *Graduate Teaching Assistant* 1996

- **Fluid Mechanics** (Hydraulic Systems) (*Undergraduate, Spring 1996*): Prof Shafiq Islam

University of Cincinnati - Educational Services: *Undergrad Math/Physics Tutor*
1994-95

Computational Experience

Numerical Methods	***Forward modeling:*** Arbitrary Lagrangian-Eulerian (ALE), particle-in-cell, finite element & finite difference formulations; ***Inverse modeling:*** linear/non-linear optimization, Markov chain Monte-Carlo (MCMC) Bayesian formulations.
Scientific Programming	Python (Numpy/Scipy/Matplotlib/VTK), Fortran 95/90/77, C
Software Applications	GMT, Matlab/Octave, CUBIT, Paraview, gOcad, SAC, Tekla Structures
System Administration	Linux/OS-X administration; shell-scripting; remote desktop management Currently, sole system administrator for: • 48-core RHEL Linux workstation (NTU) • 12-core Ubuntu Linux workstation (USU)

Selected Invited Talks

- Institute of Geological & Nuclear Sciences (GNS-Science), Lower Hutt, New Zealand
- Academia Sinica, Taipei, Taiwan
- National Taiwan University, Taipei, Taiwan
- National Central University, Jongli, Taiwan
