Education

California Institute of Technology, *Division of Geological and Planetary Sciences*

Ph.D. Geophysics, 2010

Dissertation: Mechanical Models for Interseismic Deformation in Subduction Zones

Advisor: Prof. Mark Simons

University of Kentucky, *Department of Geological Sciences*

M.S. Geology, 2003

Thesis: Nonlinear Asperity-Scale Frictional Melting Model

Advisors: Prof. Kieran O'Hara (Geol.), Prof. Jim McDonough (Mech. Eng.)

University of Cincinnati, *Department of Civil & Environmental Engineering*

M.S. Environmental Engineering, 1997

Thesis: A Model for Urban Ozone Dynamics in the Cincinnati Metropolitan Area

Advisors: Prof. Pratim Biswas, Prof. Shafiq Islam

Indian Institute of Technology – Bombay, *Department of Mechanical Engineering*

B.Tech. Mechanical Engineering, 1994

Senior Thesis: Experimental & Theoretical Study of Gas-Liquid Slug Flows in Horizontal Channels

Thesis Advisor: Prof. Kannan Iyer

Professional Experience

Post-doctoral Associate	Utah State University	Mentor: Tony Lowry	2014 - Present
Post-doctoral Fellow	National Taiwan University	Mentor: John Suppe	2010-2014
Teaching Assistant	California Institute of Technology (<i>Geodynamics, Inverse Theory, Field Geophysics</i>)		2005-2007
Research Assistant	California Institute of Technology	Advisor: Mark Simons	2004-2010
Research Assistant	University of Kentucky	Advisor: Kieran O'Hara	2001-2003
Teaching Assistant	University of Cincinnati (<i>Fluid Mechanics</i>)		1995-1996
Environmental Engineer	Science Applications International Corporation		1997-2002

Grants, Awards and Honors

Grants Pending, Utah State University

NSF-Earthscope/Tectonics, PI: Modeling post-Laramide geodynamic evolution of the Colorado Plateau and its Basin and Range margin: connections from the mantle to the surface; with Joel Pederson (USU) and Sean (Wash. State U.); \$168,946 to USU. 2016-2018

Gutenberg Fellowship, Seismological Laboratory, California Institute of Technology 2003-2004
 Department-wide competitive award given to the best incoming PhD student

Pirtle Fellowship, Department of Geological Sciences, University of Kentucky 2001-2003

Research Interests

Crustal and lithospheric dynamics: 3D/4D numerical modeling of regional tectonic deformation over timescales for mountain-building/orogenesis (tens of million years), incorporating plate-motion history, as well as realistic material properties (rheology) and Earth structure.

Developing spatio-temporal constraints for numerical models (i.e., initial and boundary conditions): new plate-motion histories; lithospheric/mantle structure inferred from tomography; present-day 3D lithospheric stress field from focal-mechanisms; gridding geologic datasets.

Seismic hazards: Complete seismic-cycle simulations ($\sim 10^2$ - 10^3 yr scale) of fault creep following seismic ruptures along realistic 3D faults, using high resolution geodetic, seismic, and neotectonic datasets to constrain fault/off-fault rheology.

Professional Service

Session co-convenor, American Geophysical Union Fall Meeting (T51F/T53C) 2010

Linking Geodetic Observations to Mechanical Properties of the Lithosphere: New Methods & Models

Peer review: *NSF-EAR, Geophys. J. Intl. (GJI), Earth Planets Space (EPS), Seismol. Res. Lett. (SRL)*

Teaching Experience

- Dept. of Geology, Utah State University:** *Adjunct Faculty* 2014
- **Numerical Geodynamic Modeling** (*Graduate/Undergraduate mini-course, Fall 2014*): Prof. Tony Lowry
- Division of Geological & Planetary Sciences, Caltech:** *Graduate Teaching Assistant* 2005-07
- **Geodynamics** (*Graduate, Spring 2007*): Prof. Mike Gurnis
 - **Inverse Theory** (*Graduate, Winter 2007*): Prof. Malcolm Sambridge (visiting from ANU)
 - **Field Geophysics** (*Graduate/Undergraduate*): Profs. Rob Clayton, Mark Simons, Joann Stock.
Spring 2006: GPS, gravity, magnetic, seismic, & resistivity surveys: Chalfant Valley, E. California.
Summer '2005: Developed Matlab-based graphical user interface for field seismic refraction studies
- Dept. of Civil & Environmental Eng., Univ. of Cincinnati:** *Graduate Teaching Assistant* 1996
- **Fluid Mechanics** (Hydraulic Systems) (*Undergraduate, Spring 1996*): Prof Shafiq Islam
- University of Cincinnati - Educational Services:** *Undergrad Math/Physics Tutor* 1994-95

Computational Experience

- Numerical Methods** *Forward modeling*: Arbitrary Lagrangian-Eulerian (ALE), particle-in-cell, finite element & finite difference formulations;
Inverse modeling: linear/non-linear optimization, Markov chain Monte-Carlo (MCMC) Bayesian formulations.
- Scientific Programming** Python (Numpy/Scipy/Matplotlib/VTK), Fortran 95/90/77, C
- Software Applications** GMT, Matlab/Octave, CUBIT, Paraview, gOcad, Move, SAC
- System Administration** Linux/OS-X administration; shell-scripting; remote desktop management
 Currently, sole system administrator for:
- 48-core RHEL Linux workstation (NTU)
 - 12-core Ubuntu Linux workstation (USU)
 - 12-core MacPro (NTU)

Selected Invited Talks

- Institute of Geological & Nuclear Sciences (GNS-Science), Lower Hutt, New Zealand
- Academia Sinica, Taipei, Taiwan
- National Taiwan University, Taipei, Taiwan
- National Central University, Jongli, Taiwan
